

QUALITY AND ENVIRONMENTAL POLICY

Ecogalvanic is a leading provider of services in surface treatment of metals. We achieve this with innovative thinking, continuous improvement of our processes and operating under requirements of an effective Quality and environmental management system.

The implemented Management system is aligned with Ecogalvanic strategy to remain a EU leader in functional and decorative environmental-friendly surfaces and to become a preferred supplier in automotive industry.

We strive to provide services which meet and exceed the expectations of our customers regarding quality, delivery and environmental protection as well as prevention of pollution and environmental incidents.

We realize that our customers, employees and suppliers are key for our success and development, and therefore treat them with respect and recognition.

We strive to work with well defined, effective and efficient processes, which meets the technical requirements for surface treatment. We evaluate our processes and services in terms of quality and environmental performance, striving for continuous improvement.

We select and evaluate our business partners impartially based on objective factors such as quality, delivery, price, as well as environment prevention commitment.

We conduct our business in an environmental-friendly way and in compliance with applicable legal, customer and other requirements.

Our goals and key performance indicators (KPIs) are based on the Company's strategy and above stated commitments. Company's goals are communicated at all levels of organization and are regularly measured and followed-up.

The effectiveness of this Quality and Environmental Management System is personal commitment of each employee.

Peter Grund
Managing Director of Ecogalvanic Ltd.
